## **OUTPOON** POWER RATING

Engine Speed	Type of	<b>Gross Engine Output</b>	Net Engine Output	
rpm	Operation	kW	kW	
1500	Prime Power	185	176	
	Standby Power	204	195	

- -. The engine performance is as per GB/T2820.
- -. Ratings are based on GB/T1147.1.
- ---Prime power is available for an unlimited number of hours per year in a variable load application. The permissible average power output over 24 hours of operation shall not exceed 80% of the prime power rating.
- ---Standby power is available in the event of a utility power outage or under test conditions for up to 200 hours of operation per year. The permissible average power output over 24 hours of operation shall not exceed 80% of the standby power rating.
