

# Model:SC12E420D2

## **OUTPOON** POWER RATING

| Engine Speed | Type of       | Engine Power |     |
|--------------|---------------|--------------|-----|
| rpm          | Operation     | kW           | Ps  |
| 1500         | Prime Power   | 280          | 380 |
|              | Standby Power | 308          | 420 |

- -. The engine performance is as per GB/T2820.
- -. Ratings are based on GB/T1147.1.
- ---Prime power is available for an unlimited number of hours per year in a variable load application. The permissible average power output over 24 hours of operation shall not exceed 80% of the prime power rating.
- ---Standby power is available in the event of a utility power outage or under test conditions for up to 200 hours of operation per year. The permissible average power output over 24 hours of operation shall not exceed 80% of the standby power rating.
